

CERTIFICATE OF COMPLIANCE

(Pursuant to Section 53 of the Environmental Management Act)

THIS IS TO CERTIFY that as of the date indicated below, the site identified in Schedule A of this Certificate of Compliance has been satisfactorily remediated to meet the applicable Contaminated Sites Regulation remediation standards.

This Certificate of Compliance is qualified by the requirements and conditions specified in Schedule B.

The substances for which remediation has been satisfactorily completed and for which this Certificate of Compliance is valid are listed in Schedule C.

I have issued this Certificate of Compliance based on a review of relevant information including the documents listed in Schedule D. I, however, make no representation or warranty as to the accuracy or completeness of that information.

A Director may rescind this Certificate of Compliance if requirements and conditions imposed in the Certificate of Compliance are not complied with or any fees payable under Part 4 of the Act or regulations are outstanding.

This Certificate of Compliance should not be construed as an assurance that there are no hazards present at the site.

Peter Kickham For Director, Environmental Management Act

Schedule B

Requirements and Conditions

1. Any changes in land, vapour or water uses must be promptly identified by the responsible person in a written submission to the Director. An application for an amendment or new Certificate of Compliance may be necessary. The uses to which this condition applies are described in Schedule C and in the site investigation documents listed in Schedule D.

The documents listed in Schedule D indicate that vapour attenuation factors were applied to meet Contaminated Sites Regulation risk-based standards at the Site. These vapour attenuation factors were selected based on assumptions about the structures, locations and depths of trenches expected at the site. These assumptions include the following:

(a) Any future development on the Site will include slab on grade buildings only.

Any inconsistencies that arise between the structures, locations and depths of proposed range of structures, assumed in the selection of vapour attenuation factors in the documents listed in Schedule D must be promptly identified by the responsible person in a written submission to the Director. An application for an amendment or new Certificate of Compliance may be necessary.

Schedule C

Substances and Uses

Substances remediated in soil for commercial land soil use:

To meet numerical remediation standards:

- Benzene, ethylbenzene, toluene, xylene, and
- LEPHs.

To meet risk-based remediation standards:

VPHs.

Substances remediated in water for marine aquatic life water use:

To meet numerical remediation standards:

- Benzene, ethylbenzene,
- EPH w_{10-19} , and
- Pyrene.

To meet risk-based remediation standards:

- Toluene.
- Naphthalene, and
- LEPHw, VHw₆₋₁₀, and VPHw.

Substances remediated in vapour for commercial land vapour use:

To meet numerical remediation standards:

- 1,2-Dichloroethane,
- 1,3,5-Trimethylbenzene, and
- VPHv.

To meet risk-based remediation standards:

• Benzene.
