

CERTIFICATE OF COMPLIANCE
(Pursuant to Section 53 of the *Environmental Management Act*)

THIS IS TO CERTIFY that as of the date indicated below, the site identified in Schedule A of this Certificate of Compliance has been satisfactorily remediated to meet the applicable Contaminated Sites Regulation remediation standards and criteria.

This Certificate of Compliance is qualified by the requirements and conditions specified in Schedule B.

The substances for which remediation has been satisfactorily completed and for which this Certificate of Compliance is valid are listed in Schedule C.

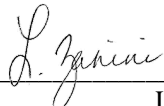

I have issued this Certificate of Compliance based on a review of relevant information including the documents listed in Schedule D. I, however, make no representation or warranty as to the accuracy or completeness of that information.

A Director may rescind this Certificate of Compliance if requirements and conditions imposed in the Certificate of Compliance are not complied with or any fees payable under Part 4 of the Act or regulations are outstanding.

This Certificate of Compliance should not be construed as an assurance that there are no hazards present at the site.

The substances to which this Certificate of Compliance applies migrated to the site from a neighbouring source. It should not be assumed that this Certificate of Compliance certifies the remediation of all contaminants at the site.

For Director, *Environmental Management Act*

Schedule A

The site covered by this Certificate of Compliance is a portion of 1307 Hillside Avenue, Victoria, British Columbia which is more particularly known and described by the following metes and bounds:

Starting at the northwest corner of Lot 28, Section 4, Victoria District, Plan 263, except those parts thereof shown colored red on Plans deposited under DD 26177I and DD 25332I and except that part in Plans 10551 and 41022:

- The Point of Commencement.
- thence 74° 12' 15" for 33.162 metres;
- thence 216° 04' 27" for 33.943 metres;
- thence 271° 19' 12" for 13.051 metres;
- thence 3° 33' 13" for 18.142 metres;
- Returning to the Point of Commencement.

PID: portion of 000-421-111

The site contains part of a legal parcel depicted in an engineering drawing prepared by Keystone Environmental Ltd. on July 12, 2017.

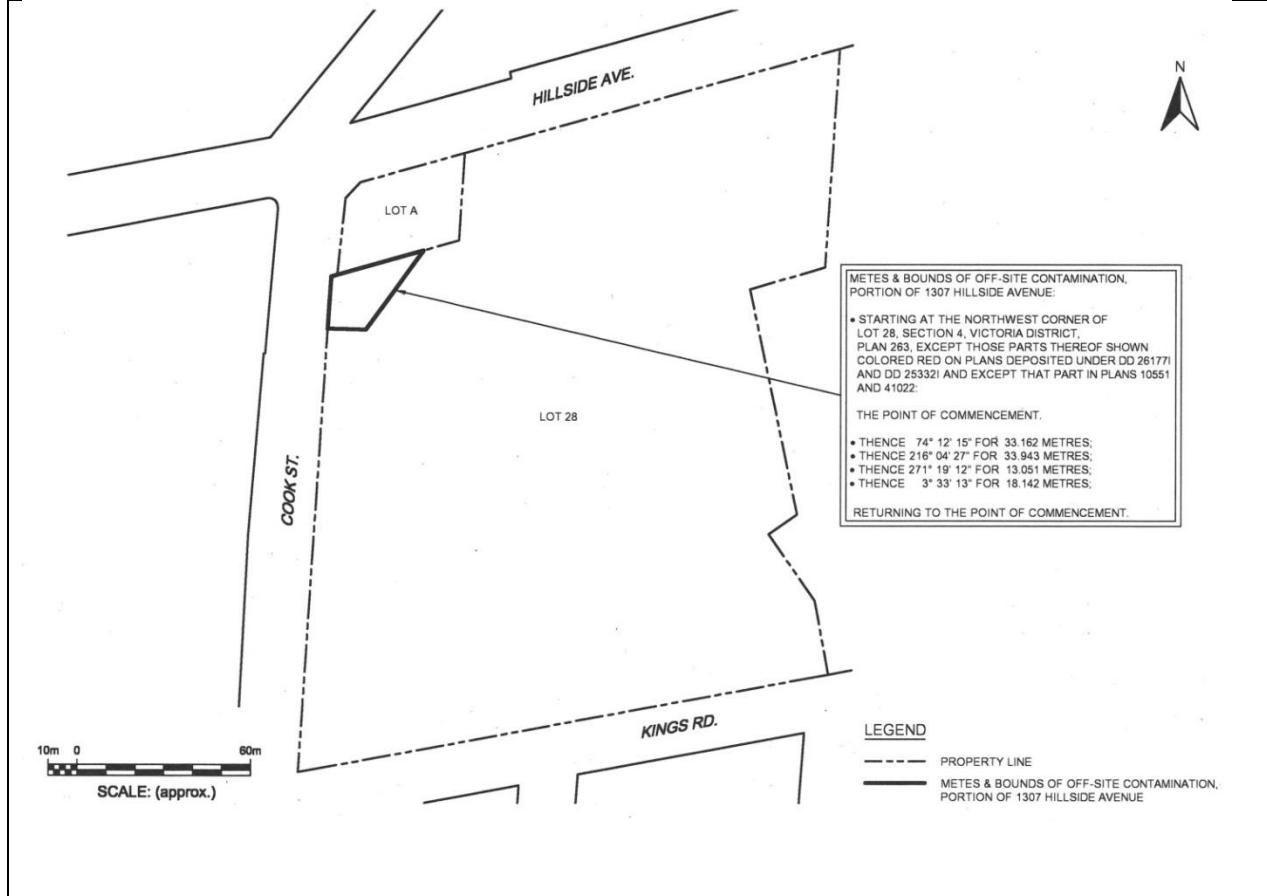

The approximate centre of the site using the NAD (North American Datum) 1983 convention is:

Latitude: 48° 26' 23.68"
Longitude: 123° 21' 5.46"

Schedule B

Requirements and Conditions

1. Any changes in land, vapour, and water uses must be promptly identified by the responsible person in a written submission to the Director. An application for an amendment or new Certificate of Compliance may be necessary. The uses to which this condition applies are described in Schedule C and in the site investigation documents listed in Schedule D.

The documents listed in Schedule D indicate that vapour attenuation factors were applied to meet Contaminated Sites Regulation numerical standard at and adjacent to the site. These vapour attenuation factors were selected based on assumptions about the structures, locations and depths of buildings existing or expected at and adjacent to the site. These assumptions include the following:

(a) Buildings constructed on the site will not be in contact with the groundwater.

Any inconsistencies that arise between the structures, locations and depths of proposed or constructed buildings at or adjacent to the site and the range of structures, locations and depths of buildings assumed in the selection of vapour attenuation factors in the documents listed in Schedule D must be promptly identified by the responsible person in a written submission to the Director. An application for an amendment or new Certificate of Compliance may be necessary.

2. The principal risk controls which must be present or implemented and must be maintained at the site include the following:
 - (a) Groundwater from the site must not be used as drinking water.
3. If requested by the Director, the responsible person must provide a signed statement indicating whether the principal risk controls listed in clause 2 of this Schedule have been and continue to be met. This may include providing a signed statement by an Approved Professional.

Schedule C

Substances and Uses

Substances remediated in water for drinking water use:

To meet numerical remediation standards:

- Benzene, ethylbenzene, toluene and xylenes (total).

To meet risk-based remediation standards:

- Methyl tertiary butyl ether.
