

CERTIFICATE OF COMPLIANCE

(Pursuant to Section 53 of the *Environmental Management Act*)

THIS IS TO CERTIFY that as of the date indicated below, the site identified in Schedule A of this Certificate of Compliance has been satisfactorily remediated to meet the applicable Contaminated Sites Regulation remediation standards and criteria.

This Certificate of Compliance is qualified by the requirements and conditions specified in Schedule B.

The substances for which remediation has been satisfactorily completed and for which this Certificate of Compliance is valid are listed in Schedule C.

I have issued this Certificate of Compliance based on a review of relevant information including the documents listed in Schedule D. I, however, make no representation or warranty as to the accuracy or completeness of that information.

A Director may rescind this Certificate of Compliance if requirements and conditions imposed in the Certificate of Compliance are not complied with or any fees payable under Part 4 of the Act or regulations are outstanding.

This Certificate of Compliance should not be construed as an assurance that there are no hazards present at the site.

The substances to which this Certificate of Compliance applies migrated to the site from a neighbouring source. It should not be assumed that this Certificate of Compliance certifies the remediation of all contaminants at the site.

Schedule A

The site covered by this Certificate of Compliance is a portion of the roadway (120th Street) located adjacent to 11996 70th Avenue, Delta, British Columbia which is more particularly known and described by the following metes and bounds:

Starting at the southeast corner of Lot 313, of Subdivision Plan of Lot 318, Northeast Quarter, Section 13, Township 4, New Westminster District, Plan 41155:

- The Point of Commencement.
- Thence 88° 55' 21" for 12.546 meters;
- Thence 0° 51' 23" for 20.552 meters;
- Thence 290° 00' 54" for 9.017 meters;
- Thence 352° 11' 06" for 14.268 meters;
- Thence 281° 24' 23" for 2.442 meters;
- Thence 180° 04' 00" for 38.490 meters;
- Returning to the Point of Commencement.

Furthermore the following soil management area contained within the above metes and bounds, starting at the southeast corner of Lot 313, of Subdivision Plan of Lot 318, Northeast Quarter, Section 13, Township 4, New Westminster District, Plan 41155:

- Thence 0° 04' 00" for 4.780 metres to the Point of Commencement.
- Thence 79° 55' 42" for 9.814 metres;
- Thence 343° 05' 07" for 18.182 metres;
- Thence 352° 11' 06" for 14.268 metres;
- Thence 281° 24' 23" for 2.442 metres;
- Thence 180° 04' 00" for 33.710 metres;
- Returning to the Point of Commencement.

The site contains part of a legal parcel depicted in an engineering drawing prepared by Keystone Environmental Ltd. on November 21, 2017.

The approximate centre of the site using the NAD (North American Datum) 1983 convention is:

Latitude: 49° 07' 47.40"
Longitude: 122° 53' 26.00"

Schedule B

Requirements and Conditions

1. Any changes in land, vapour and water uses must be promptly identified by the responsible person in a written submission to the Director. An application for an amendment or new Certificate of Compliance may be necessary. The uses to which this condition applies are described in Schedule C and in the site investigation documents listed in Schedule D.

The documents listed in Schedule D indicate that vapour attenuation factors were applied to meet Contaminated Sites Regulation numerical standard at and adjacent to the site. These vapour attenuation factors were selected based on assumptions about the structures, locations and depths of buildings existing or expected at and adjacent to the site. These assumptions include the following:

- (a) The subject site's current and future use is roadway (Industrial Use). There will be no future buildings on the site.

Any inconsistencies that arise between the structures, locations and depths of proposed or constructed buildings at the site and the range of structures, locations and depths of buildings assumed in the selection of vapour attenuation factors in the documents listed in Schedule D must be promptly identified by the responsible person in a written submission to the Director. An application for an amendment or new Certificate of Compliance may be necessary.

Schedule C

Substances and Uses

Substances remediated in soil for industrial land soil use:

To meet risk-based remediation standards:

- Benzene (71-43-2), toluene (108-88-3) and xylene (1330-20-7).

Substances remediated in water for drinking water use:

To meet numerical remediation standards:

- Benzene (71-43-2), EPH_{W10-19} (NA), ethylbenzene (100-41-4), MTBE (1634-04-4), naphthalene (91-20-3), toluene (108-88-3), VH_{W6-10} (NA) and xylenes total (1330-20-7).

Substances remediated in water for freshwater aquatic life water use:

To meet numerical remediation standards:

- Benzene (71-43-2), ethylbenzene (100-41-4), EPH_{W10-19} (NA), $LEPH_W$ (NA), naphthalene (91-20-3), toluene (108-88-3), VH_{W6-10} (NA), VPH_W (NA) and xylenes total (1330-20-7).
