Expanded Process: Additional Report Review Services by CSAP on Behalf of the Ministry  
811 3072 5460

### Question Details

#	Question
1	I understand there is a backlog of release requests with the Ministry. Will this shift result in MoE clearing the backlog of release requests in the near term? What should we anticipate for response time on a release request in the que for Scenario 1?
2	Will you be sending the reminders to the responsible person AND the consultant? Sometime the person responsible is not so responsible... may not pass on the reminder to their consultant
3	Will there be an option to pay using credit card
4	Can you please point us to the enabling legislation or protocols that put this new program into force.
5	\$2,000 per site per submission? Or per year?
6	Further to Alison Coles question regarding payment, what about payment by EFT?
7	Are CoC amendments excluded from the CSAP review committee scope?
8	For clarity - there will be no ENV fees if a document goes through CSAP?
9	We have a site where a CoC Schedule B risk control will be temporarily removed due to construction. Schedule B says we are required to notify the director of this temporary removal. Would this notification go to ENV or CSAP?
10	Is there a process to followup on non-compliance of required submissions? Has the MENV ever enforced penalties for non-submittal? Are there plans to review historical approved instruments on file in the site registry and add to the CSAP reporting deadline tracking schedule?
11	Did I see that reports required as condition of a permit or approval will NOT be submitted to CSAP?
12	Thanks Dave and Heather. What other ENV services are being considered for transfer to CSAP in future?
13	If improved timelines is one of the goals, once a forgotten requirement is rectified, will the application retain its place in the queue or will it go to the back of the line?
14	Are there plans to expand the role of the RSC to include P6 pre-approvals? And P4/P9 Releases? These applications seem to be the most significant hold up in the overall process currently.
15	Is there a "penalty/consequences" to the submitting AP if the RSC determines a submittal is not sufficient/compliant? (similar to the instrument audit process)

16	What are the requirements for selection onto the review committee?
17	After CSAP does their review, do they send out the letter of confirmation to the RP? Or does the reviewed package go to BC ENV? If the latter, what sort of time frame for a confirmation letter that things are received in an approved time frame will BC ENV take?
18	Are there plans to review historical approved instruments on file in the site registry and add to the CSAP reporting deadline tracking schedule
19	What if a CoC has been obtained prior to site sale, and the property has been transferred to a new owner. Any changes to the land use are no longer known or in control of the RP who obtained the instrument. Who is responsible for notifying the Director of a change in land use (ie from IL to RL)?
20	If you are out of compliance, only timewise (missed the timing deadline), do you submit to ENV or CSAP
21	can you please repeat that last question Heather?
22	The CSAP screening process provided to APs by CSAP (e.g., by Anna) has been very beneficial given that we all seem to make the odd mistake in our submissions. Does ENV provide a similar screening process?
23	For a high risk site with an annual monitoring requirement, can a request to change a directors requirement be submitted within the monitoring report? Or should this be a separate submission?
24	Will there be a guidance document or ENV webpage that presents/summarizes this process?
