Dear Mr. Hungerford:

**Re: Preliminary Determination – Proposed Statutory Right of Way at the
Western Boundary of Proposed Lot 1, 86 Southeast Marine Drive,
Vancouver, British Columbia**

Please find enclosed a Preliminary Determination respecting the site referenced above and be advised of the following:

1. The Director has made a Preliminary Determination that the site is not contaminated because the numerical standards and criteria of the Contaminated Sites Regulation have been met at the site.
2. Information about the site will be included in the Site Registry established under the *Environmental Management Act*.
3. The provisions of this Preliminary Determination are without prejudice to the right of the Director to make orders or impose requirements as the Director may deem necessary in accordance with applicable laws. Nothing in this Preliminary Determination will restrict or impair the Director's power in this regard.
4. A qualified environmental consultant should be available to identify, characterize and appropriately manage:
 - (a) any environmental media that may be contaminated, or
 - (b) soil which may exceed the standards triggering a Contaminated Soil Relocation Agreement set out in section 40 of the Contaminated Sites Regulation

and may be encountered during any future subsurface work at the site.

5. Groundwater wells that are no longer required must be properly decommissioned in accordance with the *Water Sustainability Act's* Groundwater Protection Regulation.

This is to advise that the Director will consider submissions received within 35 days after delivery of this Preliminary Determination before a Final Determination is made.

If you require clarification of any aspect of this Preliminary Determination, please contact the undersigned at James.Plett@gov.bc.ca.

Yours truly,

James Plett
Senior Contaminated Sites Officer

PRELIMINARY DETERMINATION
(Pursuant to Section 44 of the *Environmental Management Act*)

I have made a Preliminary Determination that the site identified in Schedule A of this document **is not** a contaminated site.

This Preliminary Determination is qualified by the requirements and conditions specified in Schedule B.

The site does not have concentrations of the substances specified in Schedule C that exceed the applicable standards and criteria prescribed in the Contaminated Sites Regulation for determining whether a site is a contaminated site.

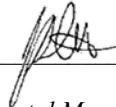

I have issued this Preliminary Determination based on a review of relevant information including the documents listed in Schedule D. I, however, make no representation or warranty as to the accuracy or completeness of that information.

This is to advise that I will consider submissions received 35 days after delivery of this Preliminary Determination before a Final Determination is made.

In accordance with the *Environmental Management Act*, I will notify persons with an interest in the subject site once a Final Determination is made.

This Preliminary Determination should not be construed as an assurance that there are no hazards present at the site.

For Director, *Environmental Management Act*

Schedule A

The site covered by this Preliminary Determination includes a portion of 86 Southeast Marine Drive, Vancouver, British Columbia, which is more particularly known and described as:

Commencing at the NW corner on LOT 1 NORTH PART OF BLOCK 13 DISTRICT LOT 322 PLAN 12653 (P.o.C.) then proceeding:

To the right 3.177m along the arc curve whose radius is 441.960m and whose chord bears S 71° 33' 42" E to P1, then

S 2° 03' 44" W 94.723m to P2, then
N 88° 06' 27" W 3.048m to P3, then
N 02° 03' 44" E 95.627m P.o.C.

PID: Portion of 008-864-004

The site contains part of a legal parcel depicted in legal sketch plan 9771-22 prepared by Gregory Marston, B.C. Land Surveyor. The site consists of the proposed statutory right of way along the western boundary of Proposed Lot 1. The site is more particularly described by the above metes and bounds and depicted in an engineering drawing prepared by PGL Environmental Consultants on April 26, 2021.

The approximate centre of the site using the NAD (North American Datum) 1983 convention is:

Latitude: 49° 12' 41.85"
Longitude: 123° 06' 21.02"

Schedule B

Requirements and Conditions

1. Any changes in land, vapour or water uses must be promptly identified by the responsible person in a written submission to the Director. An application for an amendment or new Determination of Contaminated Site may be necessary. The uses to which this condition applies are described in Schedule C and in the site investigation documents listed in Schedule D.
