

CSAP Election of Directors 2017 of At Large Directors

Candidate Statements

Vijay Kallur, M.Sc., P. Eng., FEC

Parent organization: APEGBC - Numerical Standards Approved Professional

I have over 28 years of multidisciplinary experience in various sectors. Since 1997, I have served on other committees/Boards including at APEGBC (CPD, DEP, Sustainability and Practice Review), BCEIA, MOE (spill response regime). I have been practicing as a CSAP since 2005 on high risk and small/medium risk sites, and developed innovative solutions working with MOE and other CSAPs using a collaborative approach. As a Director, my primary interest is in assisting the Society in maintaining a sustainable framework and high standards of CSAP practice, and, assisting BC MoE in effective implementation of regulations including the Stage 10 Amendments.

Trish Miller, M.Sc., R.P. Bio.

Parent organization: CAB – Risk-based Standards Approved Professional

I have over 25 years of experience as a contaminated sites risk assessment practitioner and 10 years of experience as an Approved Professional. I have held positions on the Board, Technical Review and currently serve on the Performance Assessment Committees. My vision as a Board member is to facilitate processes and technical guidance to support APs so that we can enhance our services while maintaining the oversight and review of high quality work necessary for confidence of industry, the public and the MOE.

Guy Patrick, M.Sc., P. Eng.

Parent organization: APEGBC - Numerical Standards Approved Professional

I would be honored to serve again as a member of the Board of Directors of CSAP. I have been a member of CSAP since its inception and currently serve on the Technical Review Committee. I served previously as Chair of the Discipline and Membership Committees. As a Board member, I will strive to bring my experience and expertise to the table on behalf of APs, and look forward to serving you as we move towards a changing landscape.

Peter Reid, M. Eng., M.B.A., P. Eng.

Parent organization: APEGBC – Numerical Standards Approved Professional

It's been my pleasure to serve as CSAP's TRC chair and VP. I've worked hard at applied research, aligning MOE and CSAP goals, updating guidance, and member health. I request the opportunity to serve you for a second term. I want to champion greater use of Professional Judgement; encourage wider sharing of data for establishing background concentrations; define areas for no drinking water; and celebrate the benefits CSAP members bring to BC. At CSAP we've collectively created an envied framework. I hope to continue the development of this framework so we can continue to remediate and redeploy sites throughout BC.

Tara Siemens Kennedy, P. Chem., MET

Parent organization: ACPBC - Risk-based Standards Approved Professional

I am seeking a seat on the CSAP Board of Directors. I have been a Risk Assessment AP since 2011 and have made more than 20 submissions. I am a member of the PAC, a Detailed Screener, a PA Panel member (since 2013), and have in the past participated in exam development and experience reviews. I recently led a TRC project that reviewed the requirements for PVPs, with recommendations made to the MoE. I am interested in becoming a Board member so that I can continue to contribute to the Society, with an interest in ensuring effective and timely communication of technical and regulatory information to APs.

Andrew Sorensen, P. Eng.

Parent organization: APEGBC - Numerical Standards Approved Professional

It has been my privilege for the past two years to serve on the CSAP Board as chair of the Professional Development Committee. In that role, I have led the development of our PD events and the Technical Stream of the MOE's 2016 Conference. In general, I consider myself an active Board member who advocates for practical solutions to the challenges we face, an approach which I believe will be particularly important for the Omnibus changes. If permitted a second term, I will continue with our education endeavours, promote professional judgement, and look for ways to celebrate our successes.

Bob Symington, P. Geo.

Parent organization: APEGBC - Numerical Standards Approved Professional

My experience as a past director of the CSAP Society has given me valuable insight into its operations and initiatives. As the coordinator of the CSAP Webinar series, I assisted members in putting together webinars to provide timely updates regarding changing technologies and regulatory directions to assist AP's in their practices. I support the use of professional judgment and believe we must engage the MOE in this discussion and continue down this path. I am also a strong supporter of the AP system, as I believe that it encourages the timely release of instruments on behalf of our stakeholders.
