

CSAP Society 2015 Election of At Large Directors Candidate Profiles

May 26, 2015

Colin Dunwoody, P.Eng.

Parent organization: APEGBC - Numerical Standards Approved Professional

As stated when last elected, I am interested in managing our relationship with MoE and promoting the use of professional judgement by CSAP members. We have made some progress in this direction but have also identified some stumbling blocks. My objective going forward is working with MoE to develop reasonable expectations on what is required in submissions to CSAP/MoE such that submitting APs know, from the start, what they have to provide. This should result in limiting the erosion of turn-around time for instruments and provide for consistent MoE and CSAP responses. I was instrumental in instigating the “annotated SoSC” which helps to streamline the submission process.

Robin Jones, M.A.Sc., M.B.A., P. Eng.

Parent organization: APEGBC - Numerical Standards Approved Professional

I am seeking re-election for a seat on the CSAP Board of Directors. I have been a member of the board for the last two years including the last year as vice President. I would like to continue the work I have started with CSAP and strengthen our organization and the role we play in the management of contaminated sites. I bring a strong background with diverse experience to the Board. I have worked in both the lower mainland and in the interior of BC (Kelowna). I have 22 years of experience, have made numerous CSAP submissions (>40), including CoC's, AiPs, CSRAs and determinations. I hold both a Masters in Engineering and an MBA. I believe my background allows me to understand issues from both a technical and business perspective and provide valuable input into the development of policy decisions.

Vijay Kallur, M.Sc., P. Eng., FEC.

Parent organization: APEGBC - Numerical Standards Approved Professional

I request your support for me to assist the CSAP Society in the role of Director At Large. With over 25 years' experience in engineering and CSAP since 2005, my interest is to assist the CSAP Society in continuing to develop a sustainable framework for the benefit of all members by helping draw upon the significant experience of larger organizations such as APEGBC. This would include maintaining high standards for the quality of our work and also avoid re-inventing the wheel for bylaw amendments on various matters including practice reviews. I have significant experience with APEGBC and was recently awarded a Fellowship to Engineers Canada recognizing my contributions.

Duncan MacDonald, P.Eng.

Parent organization: APEGBC - Numerical Standards Approved Professional

My interest in running for the Board is to represent the interests of the ‘active users’ of our society with a common sense approach to the many issues facing our Society and its interaction with the public and the Ministry of Environment. I believe this to be a key consideration for the success of our Society. I have been one of the more active members with respect to submissions since 2007. I have served as a Performance Assessment Panel member since 2013 I have participated in the exam committee. I am recently a member of the Performance Assessment Committee.

Robert McLenehan, P.Eng.

Parent organization: APEGBC - Numerical Standards Approved Professional

I have been on the Roster/ CSAP since 2000, successfully completing 32 instruments and have 30 years of work experience in industry and government. With MOE I took part in developing the Roster process, remaining a strong supporter of the continued growth, adaptation, and success of CSAP. I have six years of experience as a Board Director for Golder Associates. I regularly attend and participate in CSAP AGMs/ workshops and conduct performance assessments. If elected, I would work to engage APs to review MOE/CSAP processes, and promote positive change and the value of professional judgment.

Peter T. Reid, M. Eng., P.Eng.

Parent organization: APEGBC - Numerical Standards Approved Professional

Peter Reid has been an active roster and CSAP since 2005. Most recently he has been a member of the technical review committee at CSAP. He supports a more collaborative approach to contaminated sites assessment where knowledge and work products are shared. Most recently he has been involved in a CSAP GIS project where past work by members can be effectively shared. He is supporter of practical and cost effective assessment and remediation methodologies.

Andrew Sorensen, P.Eng.

Parent organization: APEGBC - Numerical Standards Approved Professional

I have been an AP in good standing since 2010 and have been working in the contaminated sites industry since 1998. My experience has been primarily in the consulting sector although I also spent three years with the federal government, which I believe gives me an added perspective for our role in the industry. I have experience on other boards and am currently the membership chair for the BC Environmental Industry Association. I am also an active member of the CSAP Professional Development Committee. I believe I represent some "new blood" and I would welcome the opportunity to contribute to the Board.

Scott Steer, R.P.Bio.

Parent organization: CAB – Risk-based Standards Approved Professional

I am interested in serving on the Board of Directors to participate in shaping CSAP's function and ensuring it remains fair and responsive to its members, in this time when CSAP's role is expanding. I feel I would be an effective Director given my experience with CSAP and as a business owner. I have been a CSAP member as a risk assessment AP since 2010 with more than 20 submissions. I have served on CSAP committees including exam development and experience review and contributed to development of various technical guidance documents. I have owned/operated an environmental consulting company since 2009.
