Dear Mark Shieh:

Re: Final Determination – 307 Main Street, Vancouver, British Columbia

Please find enclosed a Final Determination respecting the site referenced above and be advised of the following:

1. The Director has made a Final Determination that the site is not contaminated because the numerical standards and criteria of the Contaminated Sites Regulation have been met at the site.
2. Information about the site will be included in the Site Registry established under the *Environmental Management Act*.
3. The provisions of this Final Determination are without prejudice to the right of the Director to make orders or impose requirements as the Director may deem necessary in accordance with applicable laws. Nothing in this Final Determination will restrict or impair the Director's power in that regard.
4. A qualified environmental consultant should be available to identify, characterize and appropriately manage:
 - (a) any environmental media that may be contaminated, or
 - (b) soil which may exceed the standards triggering a Contaminated Soil Relocation Agreement set out in section 40 of the Contaminated Sites Regulationthat may be encountered during any future subsurface work at the site.
5. Groundwater wells that are no longer required must be properly decommissioned in accordance with the *Water Sustainability Act's* Groundwater Protection Regulation.

6. Please note that future site development may create preferential pathways for vapour. In this event, further assessment and remediation of vapour may be warranted.

Issuance of this Final Determination is a decision that may be appealed under Part 8 of the *Environmental Management Act*.

If you require clarification of any aspect of this Final Determination, please contact the undersigned at site@gov.bc.ca (toll free via Enquiry BC at 1-800-663-7867).

Yours truly,

Lavinia Zanini, P.Ge
Senior Contaminated Sites Officer

FINAL DETERMINATION
(Pursuant to Section 44 of the *Environmental Management Act*)

I have made a Final Determination that the site identified in Schedule A of this document **is not** a contaminated site.

This Final Determination is qualified by the requirements and conditions specified in Schedule B.

The site does not have concentrations of the substances specified in Schedule C that exceed the applicable standards and criteria prescribed in the Contaminated Sites Regulation for determining whether a site is a contaminated site.

I have issued this Final Determination based on a review of relevant information including the documents listed in Schedule D. I, however, make no representation or warranty as to the accuracy or completeness of that information.

This Final Determination should not be construed as an assurance that there are no hazards present at the site.

October 10, 2023
Date Issued

Lavinia Zanini
For Director, *Environmental Management Act*

Schedule A

The site covered by this Final Determination is located at 307 Main Street, Vancouver, British Columbia which is more particularly known and described as:

Lot 2 Block 9 District Lot 196 Plan 184

PID: 015-685-390

The approximate centre of the site using the NAD (North American Datum) 1983 convention is:

Latitude: 49° 16' 55.00"
Longitude: 123° 06' 00.00"

Schedule B

Requirements and Conditions

1. Any changes in land, vapour, or water uses must be promptly identified by the responsible person in a written submission to the Director. An application for an amendment or new Determination of Contaminated Site may be necessary. The uses to which this condition applies are described in Schedule C and in the site investigation documents listed in Schedule D.

The documents listed in Schedule D indicate that vapour attenuation factors were applied to meet Contaminated Sites Regulation numerical standards at the site. These vapour attenuation factors were selected based on assumptions about the structures, locations and depths of buildings existing or expected at the site. These assumptions include the following:

- (a) Any future building(s) that does not require active pumping or drawdown of groundwater will be underlain by a concrete slab; and,
- (b) Any future building(s) that requires active pumping or drawdown of groundwater will be underlain by a parkade.

Any inconsistencies that arise between the structures, locations and depths of proposed or constructed buildings at the site and the range of structures, locations and depths of buildings assumed in the selection of vapour attenuation factors in the documents listed in Schedule D must be promptly identified by the responsible person in a written submission to the Director. An application for an amendment or new Determination of Contaminated Site may be necessary.

Schedule C

Substances and Uses

Substances evaluated in soil for high density residential land soil use:

To meet numerical standards prescribed for defining whether a site is contaminated:

acenaphthene	83-32-9
aluminium	7429-90-5
anthracene	120-12-7
antimony	7440-36-0
arsenic	7440-38-2
barium	7440-39-3
benz(a)anthracene	56-55-3
benzene	71-43-2
benzo(a)pyrene	50-32-8
benzo(b+j)fluoranthenes	205-99-2 & 205-82-3
benzo(k)fluoranthene	207-08-9
beryllium	7440-41-7
boron	7440-42-8
bromodichloromethane	75-27-4
bromoform	75-25-2
cadmium	7440-43-9
carbon tetrachloride	56-23-5
chlorobenzene	108-90-7
chloroform	67-66-3
chloronaphthalene,2-	91-58-7
chromium	7440-47-3
chrysene	218-01-9
cobalt	7440-48-4
copper	7440-50-8
dibenz(a,h)anthracene	53-70-3
dibromochloromethane [DBCM]	124-48-1
dibromoethane, 1,2-	106-93-4
dichlorobenzene, 1,2-	95-50-1
dichlorobenzene, 1,3-	541-73-1
